Computer Science graduate from Universitas Esa Unggul (GPA 3.58/4.00) with hands-on experience in software development, software testing, debugging, and web application development. Experienced in performing functional, API, end-to-end, and usability testing, as well as troubleshooting web applications across different devices. Familiar with Selenium, Postman, RESTful API, Git/GitHub, React.js, JavaScript, PHP, Laravel, FastAPI, MySQL, and Python. Detail-oriented and analytical, with strong problem-solving, communication, and teamwork skills and the ability to adapt to new technologies.

WORK EXPERIENCE

Web Development Intern

Universitas Esa Unggul – Bureau of Digital Marketing, Website Development Division **October 2025 - January 2026**

- Contributed to the development and maintenance of university website features to support digital marketing needs.
- Performed debugging and testing to identify issues and ensure website performance and responsiveness across different devices.
- Improved UI/UX of landing pages and promotional pages to enhance usability and accessibility.
- Collaborated with the digital marketing team on website content updates, landing pages, and campaign materials.

Fullstack Developer (Freelance, Remote)

Dashboard Pusat Penelitian dan Penerbitan UIN Jakarta **October 2025 - January 2026**

- Designed and developed an administrative dashboard from scratch for managing research, publication, incentive, article registration, and reference book data.
- Developed CRUD, search & filtering, reporting, and responsive administrative interfaces using Laravel Filament and Blade.
- Implemented the application using PHP, Laravel, Filament, Blade, MySQL, and Tailwind CSS.
- Troubleshoot implementation issues across frontend and backend components during development.

UI/UX Designer (Freelance, Remote)

Medi Manage & Sistuber – Digital Healthcare Applications **February 2023 - November 2024**

- Conducted user research to understand patient and healthcare staff needs, developed user flows, and translated project requirements into interface designs.
- Designed more than 125 wireframes and high-fidelity screens using Figma across two healthcare digital applications, MediManage and Sistuber.
- Developed interactive prototypes and conducted usability testing to identify usability issues and improve the overall user experience.
- Communicated directly with clients to gather requirements, discuss feedback, and refine designs based on project needs.

EDUCATION

Universitas Esa Unggul – Jakarta, Indonesia

Bachelor of Informatics Engineering – IPK: 3.58 / 4.00

September 2022 – August 2026

PUBLICATIONS

Forthcoming SINTA 4 Journal Publication

Web-Based Batik Motif Recognition Using MobileNetV2 Convolutional Neural Network

August 2026

Co-Author

Penanggulangan Bahaya Kekerasan Seksual di Lingkungan Pendidikan Kelas 9 SMPN 220 Jakarta Barat | Pendidikan Karakter Unggul, Vol. 1 No. 5, 2023

PROJECT EXPERIENCE

Fullstack Developer & AI/Machine Learning Researcher

BatikEye — Interactive Batik Motif Recognition Website

April 2026 - August 2026

- Developed a fullstack web application featuring image upload, motif prediction, gallery, prediction history, and user authentication.
- Developed and tested a RESTful API using FastAPI and integrated Supabase for authentication and data storage.
- Performed Black Box Testing by designing test scenarios and test cases to verify application functionality against defined requirements.
- Performed API testing and validation using Postman to verify API responses, input validation, authentication, and application functionality.
- Performed end-to-end functional testing using Selenium to validate critical user flows and identify potential issues in the web application.
- Documented and evaluated test results to identify functional issues and verify expected system behavior.
- Implemented image input processing and validation using OpenCV and Pillow.
- Developed the frontend using React, Vite, Tailwind CSS, and Axios for API communication.
- Trained a CNN-based MobileNetV2 model using TensorFlow/Keras with an accuracy of 93.85%.
- The system was implemented at Yayasan Maleo as an interactive learning tool for arts and culture education.

University Team Project

Cisco Packet Tracer, OSPF, VLAN, DHCP, Cisco ASA, IoT

September 2025 - January 2026

- Designed a multi-site network simulation connecting two RPTRA locations using multi-area OSPF, VLAN, and DHCP.
- Configured Cisco ASA Firewall and network segmentation to manage internal, IoT, and external traffic.
- Integrated an IoT-based fire detection system with sensors, a microcontroller, siren, and sprinkler.
- Performed network connectivity testing to verify communication between devices and system components.

Fullstack Web Developer

TechTrove — E-Commerce Platform

March 2024 - August 2024

- Developed an e-commerce platform featuring product search and filtering, product details, checkout, order tracking, account management, ratings, and customer reviews.
- Developed the frontend using HTML, CSS, and JavaScript and backend using PHP and MySQL.
- Implemented security features to support user and transaction data protection.
- Performed functional testing during development to identify and resolve implementation issues.

TECHNICAL SKILLS

Frontend : React.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Next.js, Vue.js

Backend : Node.js, Express.js, PHP, Laravel, FastAPI, RESTful API

Database : MySQL, PostgreSQL, MongoDB, Supabase

AI/ML : Python, TensorFlow, Machine Learning, Computer Vision

Tools : Git, GitHub, Figma, VS Code, Claude, OpenAI Codex, Microsoft Office

Testing & QA: Black Box Testing, Test Scenario, Test Case, Functional Testing, End-to-End Testing, API Testing, Usability Testing, Selenium, Postman, Debugging

Networking : Cisco Packet Tracer, VLAN, DHCP, OSPF, IP Addressing, Network Routing, Cisco ASA Firewall

IoT : IoT Networking, Sensors, Microcontroller, Fire Detection System

Operating Systems: Linux Ubuntu

Soft Skills : Problem Solving, Analytical Thinking, Communication, Teamwork, Time Management

CERTIFICATIONS

TOEFL Prediction Test – Score 563

Webster English Course, Kediri

July 2026 - July 2028

Intermediate Web Development – Score 94.5*Dicoding Indonesia***June 2025 - June 2028****Beginner Back-End Development with JavaScript – Score 93.2***Dicoding Indonesia***June 2025 - June 2028****Web Front-End Development Fundamentals – Score 94.5***Dicoding Indonesia***April 2025 - April 2028****Beginner Front-End Web Development – Score 97.8***Dicoding Indonesia***March 2025 - March 2028****Basic Javascript Programming – Score 93.2***Dicoding Indonesia***March 2025 - March 2028****English for Business Communication – Score 86%***The British Institute (TBI), Bandung***June 2025****Basic Web Programming – Score 93.2***Dicoding Indonesia***February 2025 - February 2028****Programming Fundamentals for Software Developers – Score 94.5***Dicoding Indonesia***February 2025 - February 2028****Git with GitHub Fundamentals – Score 93.2***Dicoding Indonesia***February 2025 - February 2028****Introduction to Programming Logic (Programming Logic 101) – Score 97.8***Dicoding Indonesia***February 2025 - February 2028**

TRAINING

Business and Management – English 3*Universitas Esa Unggul***September 2025 - February 2026****Coding Camp 2025 Powered by DBS Foundation – Front-End & Back-End Developer***Dicoding Indonesia and DBS Foundation***February 2025 - July 2025**

ORGANIZATIONAL EXPERIENCE

Coordinator – Public Relations and Information*HIMASTIKA, Universitas Esa Unggul***April 2024 - December 2024**

- Managed internal and external communication and information distribution through digital media platforms.
- Coordinated communication and information needs for organizational programs including seminars, social activities, and gatherings.
- Developed communication, teamwork, coordination, and information management skills through collaboration with organizational members.
